SAFETY INSTRUCTIONS

Please, read the enclosed safety instructions carefully and observe them!
These instruments should be safeguarded by isolated or common fuses (breakers)!
For safety information the EN 61 010-1 + A2 standard must be observed.
This instrument is not explosion-safe!

TECHNICAL DATA

Measuring instruments of the OMU 408 series conform to the European regulation 89/336/EWG and the Ordinance 168/1997 Coll.

The instruments are up to the following European standards:
EN 55 022, class B
EN 61000-4-2, -4, -5, -6, -8, -9, -10, -11

Seismic resistance:
IEC 980: 1993, čl. 6

The instruments are applicable for unlimited use in agricultural and industrial areas.

CONNECTION

Supply of energy from the main line has to be isolated from the measuring leads.

2.1 Description

The OMU 408 is a 4/8 channel data logger, designed for maximum purposefulness and user comfort while maintaining its low cost. It is a multifunction instrument with the option of configuration for 8 different types of input, easily configurable in the menu.

The instrument is based on an 8-bit microprocessor with multi-channel 24-bit sigma-delta converter, which ensures the instrument high accuracy, stability and easy operation.

Major advantage of the instrument is with respect to the high rate of sampling on individual channels the feasibility to evaluate all measuring inputs simultaneously.

The OMU 408UNI is a multifunction instrument available in following types and ranges

DC:	±60/±150/±300/±1 200 mV
PM:	0...5 mA/0...20 mA/4...20 mA/±2 V/±5 V/±10 V/±40 V
OHM:	0...100 Ω/0...1 kΩ/0...10 kΩ/0...100 kΩ
RTD-Pt:	Pt 50/100/Pt 500/Pt 1 000
RTD-Cu:	Cu 50/Cu 100
RTD-Ni:	Ni 1 000/Ni 10 000
T/C:	J/K/T/E/B/S/R/N/L
DU:	Linear potentiometer (min. 500 Ω)

PROGRAMMABLE PROJECTION

Selection:	of type of input and measuring range
Measuring range:	adjustable as fixed
Setting:	manual, optional projection on the display may be set in the menu for both limit values of the input signal , e.g. input 0...20 mA > 0...850,0
Projection:	-999...9999

COMPENSATION

of conduct:	in the menu it is possible to perform compensation for 2-wire connection
of conduct in probe:	internal connection (conduct resistance in measuring head)
of CJC (T/C):	manual or automatic, in the menu it is possible to perform selection of the type of thermocouple and compensation of cold junctions, which is adjustable or automatic (temperature at the brackets)

LINEARIZATION

Linearization:*	by linear interpolation in 254 points (solely via OM Link)

DIGITAL FILTERS

Floating averange:	from 2...30 measurements
Exponen.average:	from 2...100 measurements
Rounding:	setting the projection step for display

MATHEMATIC FUCTIONS

Min/max. value:	registration of min./max. value reached during measurement
Tare:	designed to reset display upon non-zero input signal
Peak value:	the display shows only max. or min. value
Mat. operations:	polynome, 1/x, logarithm, exponential, power, root, sin x and mathematic operatin between input - total, divergence, divide

* only for type DC, PM, DU

EXTERNAL CONTROL

Lock: control keys blocking
Hold: display/instrument blocking
Tare: tare activation/resetting tare to zero
Resetting MM: resetting min/max value
Memory: data storage into instrument memory
SWTCH: switching measuring inputs

2.2   Operation

The instrument is set and controlled by five control keys located on the front panel. All programmable settings of the instrument are performed in three adjusting modes:

LIGHT   **Simple programming menu**
             - contains solely items necessary for instrument setting and is protected by optional number code

PROFI   **Complete programming menu**
             - contains complete instrument menu and is protected by optional number code

USER   **User programming menu**
             - may contain arbitrary items selected from the programming menu (LIGHT/PROFI), which determine the right (see or change)
             - acces without password

All programmable parameters are stored in the EEPROM memory (they hold even after the instrument is switched off).

OML**INK**   Complete instrument operation and setting may be performed via OM Link communication interface, which is a standard equipment of all instruments.
             The operation program is freely accessible (www.orbit.merret.cz) and the only requirement is the purchase of OML cable to connect the instrument to PC. It is manufactured in version RS 232 and USB and is compatible with all ORBIT MERRET instruments. Another option for connection is with the aid of data output RS 232 or RS 485 (without the need of the OML cable).
The program OM LINK in „Basic" version will enable you to connect one instrument with the option of visualization and archiving in PC. The OM Link „Standard" version has no limitation of the number of instruments connected.

2.3   Options

Comparators are assigned to monitor 4 or 8 limit values with relay output. The user may select limits regime: LIMIT/DOS-ING/FROM-TO. The limits have adjustable hysteresis within the full range of the display as well as selectable delay of the switch-on in the range of 0...99,9 s. Reaching the preset limits is signalled by LED and simultaneously by the switch-on of the relevant relay.

Data outputs are for their rate and accuracy suitable for transmission of the measured data for further projection or directly into the control systems. We offer an isolated RS232 and RS485 with the ASCII or DIN MessBus protocol.

Analog outputs will find their place in applications where further evaluating or processing of measured data is required in external devices. We offer universal analog output with the option of selection of the type of output - voltage/current. The value of analog output corresponds with the displayed data and its type and range are selectable in Menu.

Measured data record is an internal time control of data collection. It is suitable where it is necessary to register measured values. Two modes may be used. FAST is designed for fast storage (40 records/s) of all measured values up to 8 000 records. Second mode is RTC, where data record is governed by Real Time with data storage in a selected time segment and cycle. Up to 250 000 values may be stored in the instrument memory. Data transmis sion into PC via serial interface RS232/485 and OM Link.

The instrument supply leads should not be in proximity of the incoming low-potential signals.

Contactors, motors with larger input power should not be in proximity of the instrument.

The leads into the instrument input (measured quantity) should be in sufficient distance from all power leads and appliances. Provided this cannot be secured it is necessary to use shielded leads with connection to ground (bracket E).

The instruments are tested in compliance with standards for use in industrial area, yet we recommend to abide by the above mentioned principles.

MEASURING RANGES

Type	Input I	Input U
DC	±60/±150/±300/±1 200 mV

SETTING USER

profi   light

user

- **For user operation**
- **Menu items are set by the user (Profi/Light) as per request**
- **Access is not password protected**
- **Optional menu structure either tree (PROFI) or linear (LIGHT)**

4.1 Setting

The instrument is set and controlled by five control keys located on the front panel. All programmable settings of the instrument are performed in three adjusting modes:

LIGHT **Simple programming menu**
- contains solely items necessary for instrument setting and is protected by optional number code

PROFI **Complete programming menu**
- contains complete instrument menu and is protected by optional number code

USER **User programming menu**
- may contain arbitrary items selected from the programming menu (LIGHT/PROFI), which determine the right (see or change)
- acces without password

All programmable parameters are stored in the EEPROM memory (they hold even after the instrument is switched off).

Complete instrument operation and setting may be performed via OM Link communication interface, which is a standard equipment of all instruments.

The operation program is freely accessible (www.orbit.merret.cz) and the only requirement is the purchase of OML cable to connect the instrument to PC. It is manufactured in version RS 232 and USB and is compatible with all ORBIT MERRET instruments.

Another option for connection is with the aid of data output RS 232 or RS 485 (without the need of the OML cable).

Scheme of processing the measured signal
Setting and controlling the instrument is performed by means of 5 control keys located on the front panel. With the aid of these keys it is possble to browse through the operation menu and to select and set required values.

`MIN` inverted triangle indicates the item that can be placed in USER menu

`CONE. 1` broken line indicates a dynamic item, i.e. it is displayed only in particular selection/version

after pressing the key the set value will not be stored

after pressing the key the set value will be stored

30 continues on page 30

Setting the decimal point and the minus sign

DECIMAL POINT

Its selection in the menu, upon modification of the number to be adjusted it is performed by the control key ◀ with transition beyond the highest decade, when the decimal point starts flashing . Positioning is performed by ▲/▼.

THE MINUS SIGN

Setting the minus sign is performed by the key ▼ on higher decade. When editing the item substraction must be made from the current number (e.g..: 013 > ▼ , on class 100 > -87)

Control keys functions

Key	Measurement	Menu	Setting numbers/selection
●	access into USER menu	exit menu	quit editing
◀	programmable key function	back to previous level	move to higher decade
▼	programmable key function	move to previous item	move down
▲	programmable key function	move to next item	move up
✉	programmable key function	confirm selection	confirm setting/selection
▲ + ▼			numeric value is set to zero
● + ✉	access into LIGHT/PROFI menu		
● + ▼	direct access into PROFI menu		
✉ + ▲		configuration of an item for "USER" menu	
✉ + ▼		determine the sequence of items in "USER - LIGHT" menu	

Setting items into „USER" menu

- in **LIGHT** or **PROFI** menu
- no items permitted in **USER** menu from manufacture
- on items marked by inverted triangle

legend is flashing - current setting is displayed

NO — item will not be displayed in USER menu
YES — item will be displayed in USER menu with the option of setting
SHOW — item will be solely displayed in USER menu

5.0 Setting "LIGHT"

LIGHT **Simple programming menu**
- contains only items necessary for instrument setting and is protected by optional number code

- • For capable users
- • Only items necessary for instrument setting
- • Access is password protected
- • Possibility to arrange items of the „User" menu
- • Linear menu structure

Preset from manufacture

Password	"0"

MODE 1

Type of thermocouple "K"   *Example*

J   K   CONE. 1

CONE. 1

| INT.1TC | INT.2TC | EXT.1TC | EXT.2TC |

CONE. 1   Selection of the type of sensor connection

- the item is accessible only when parameters of 1st input are set

DEF = INT. 1TC

Menu	Connection	Ref. T/C
INT.1TC	measuring C.J. at instrument brackets	✗
INT.2TC	measuring C. J. at instrument brackets with anti-series connected ref. TC	✓
EXT.1TC	the entire measuring set is working under invaried and constant temperature	✗
EXT.2TC	when using compensation box	✓

CONE. 1

Type of connection > CONE. 1 = INT. 2TC   *Example*

INT.1TC   INT.2TC   CJ. TEM.

Input/Channel A T/C T/C T/C T/C T/C T/C T/C T/C T/C T/C T/C T/C

`C.J. TEM.` → `23` Setting temperature of cold junction →

C.J. TEM. — Setting temperature of cold junction
- the item is accessible only when parameters of 1st input are set
- range 0...99°C with compensation box
- **DEF** = 23

Setting temperature of cold junction > C.J. TEM. = 35 — *Example*

`23` `24` `25` `25` `35` `FORM.A`

`FORM.A` → `0000` `000.o` `00.oo`

FORM.A — Setting projection of the decimal point
- positioning of the DP is set here in the measuring mode
- **DEF** = 000.o

Projection of DP on display > 000o — *Example*

`000.o` `MENU` * subsequent item on the menu depends on instrument equipment

! For thermocoule type "B" the items CONE. 1 and C.J. TEM. are not available

! Method and procedure of setting the cold junctions is described in separate chapter on page 90

32

Type "DU"

MIN A   Setting for minimum input signal

MIN A **Setting display projection for minimum value of input signal**

- range of the setting is -999...9999

- position of the DP does not affect display projection
- the DP is automatically shifted after the value is confirmed

DEF = 0

Projection for the beginning > MIN A = 0   *Example*

0   MAX A

MAX A   Setting for maximum input signal

MAX A **Setting display projection for maximum value of input signal**

- range of the setting is -999...9999

- position of the DP does not affect display projection
- the DP is automatically shifted after the value is confirmed

DEF = 100

Projection for the end > MAX A = 5000   *Example*

100   100   100   000   0000   1000
2000   3000   4000   5000   FORM.A

FORM.A →

0000   000.o   00.oo   0.ooo   FLOA.P.

| FORM.A | Setting projection of the decimal point | DEF = 000.o |

- positioning of the DP is set here in the measuring mode

Projection of DP on display > 0000   *Example*

000.o   →   0000   →   MENU   * subsequent item on the menu depends on instrument equipment

📖 **32**   *Calibration of the beginning and the end of range of linear potentiometer is on page 38*

Type "RTD-Cu"

`MODE1` → `428-50` `428-0.1` `426-50` `426-0.1` **RTD**

MODE 1   Selection of instrument measuring range

DEF = 428-50

MODE 1	Menu	Measuring range
	428-50	Cu 50 (4 285 ppm/°C)
	428-100	Cu 100 (4 285 ppm/°C)
	426-50	Cu 50 (4 260 ppm/°C)
	426-100	Cu 100 (4 260 ppm/°C)

Range - Cu-50/4 260 ppm > MODE. 1 = 426-50   *Example*

`428-50` `428-0.1` `426-50` `CONE. 1`

`CONE. 1` → `2-WIRE` `3-WIRE` `4-WIRE`

CONE. 1   Selection of the type of sensor connection

DEF = 2- WIRE

CONE. 1	Menu	Connectiion
	2-WIRE	2-wire
	3-WIRE	3-wire
	4-WIRE	4-wire

Type of connection - 3 wire > CONE. 1 = 3-WIRE   *Example*

`2-WIRE` `3-WIRE` `FORM.A`

Input/Channel A RTD-Cu RTD-Cu RTD-Cu RTD-Cu RTD-Cu

FORM.A → 0000 000.o 00.oo C

FORM.A **Setting projection of the decimal point**   DEF = 000.o

- positioning of the DP is set here in the measuring mode

Projection of DP on display > 000o   *Example*

000.o MENU   * subsequent item on the menu depends on instrument equipment

`LIM L. 1` Setting boundary for limit 1

`10` Setting boundary for limit 1

`LIM L.1` **Setting boundary for limit 1**

- contingent modification of hysteresis or delay may be performed in "PROFI" menu

- range of the setting is -999...9999
- default "Hystresis"=0 "Delay"=0

DEF = 10

Setting limit 1 > L 1 = 22   Example

`10` `11` `12` `12` `22` `MENU`

`LIM L.2` Setting boundary for limit 2

`20` Setting boundary for limit 2

`LIM L.2` **Setting boundary for limit 2**

- contingent modification of hysteresis or delay may be performed in "PROFI" menu

- range of the setting is -999...9999
- default "Hysteresis"=0 "Delay"=0

DEF = 20

Setting limit 2 > L 2 = 51.1   Example

`20` `21` `21` `11` `011` `111`

`211` `311` `411` `511` `051 1` `0051 1`

`00051 1` `000051 1` `000051 1` `MENU`

* subsequent item on the menu depends on instrument equipment

!

Items for "Limits" and "Analog output" are accessible only if incorporated in the instrument.

LIM L.3 ⊻ → 30 — Setting boundary for limit 3

LIM L.3 — **Setting boundary for limit 3**

- range of the setting is -999...9999
- default "Hysteresis"=0 "Delay"=0

- contingent modification of hysteresis or delay may be performed in "PROFI" menu

DEF = 60

Setting limit 3 > L3 = 55 — Example

30 ▲ 31 ▲ 32 ▲ 33 ▲ 34 ▲ 35 ◄
35 ▲ 45 ▲ 55 ⊻ MENU

* subsequent item on the menu depends on instrument equipment

LIM L.4 ⊻ → 40 — Setting boundary for limit 4

LIM L.4 — **Setting boundary for limit 4**

- range of the setting is -999...9999
- default "Hysteresis"=0 "Delay"=0

- contingent modification of hysteresis or delay may be performed in "PROFI" menu

DEF = 80

Setting limit 4 > L4 = 163 — Example

40 ▲ 41 ▲ 42 ▲ 43 ◄ 43 ▲ 53 ▲
63 ◄ 063 ▲ 163 ⊻ MENU

* subsequent item on the menu depends on instrument equipment

!

If instrument with 8 relays was ordered, after setting Limit 4 follows the setting of limits 5...8.

Displayed only with options > **Comparators**

Displayed only with options ∨ **Analog output**

TYP. A.O.

0-20mA E. 4-20 4-20mA 0-5mA 0-2 V 0-5 V 0-10 V

| | **TYP. A.O.** | **Setting the type of analog output** |

Menu	Range	Description
0-20mA	0...20 mA	
E. 4-20mA	4...20 mA	with indication of error statement (<3,6 mA)
4-20mA	4...20 mA	
0-5mA	0...5 mA	
0-2 V	0...2 V	
0-5 V	0...5 V	
0-10 V	0...10 V	

DEF = 4...20 mA

Type of analog output - 0...10 V > TYP. A.O. = 0-10 V   *Example*

4-20mA 0-5mA 0-2 V 0-5 V 0-10 V MIN A.O.

MIN A.O.

0 *Assigning the display value to the beginning of the AO range*

| **MIN A.O.** | **Assigning the display value to the beginning of the AO range** |

- range of the setting is -999...9999

DEF = 0

Display value for the beginning of the AO range > MIN A.O. = 0   *Example*

0 MAX A.O.

!

Items for "Limits" and "Analog output" are accessible only if incorporated in the instrument.

MAX A.O. → 100 *Assigning the display value to the end of the AO range* →
MAX A.O. Assigning the display value to the end of the AO range   **DEF** = 100

AO range

- range of the setting is -999...9999

Display value for the end of the AO range > MAX A.O. = 120   *Example*

100 ◄ 100 ▲ 110 ▲ 120 ▼ MENU

Displayed only with options > **Analog output**

MENU

LIGHT **PROFI**

C
MENU — Setting the menu type LIGHT/PROFI

LIGHT > menu LIGHT, a simple menu, which contains only the most essential items necessary for instrument setting
> linear tree structure

PROFI > menu PROFI, a complete menu for complete instrument setting
> tree menu structure

DEF = LIGHT

Menu LIGHT > MENU = LIGHT   *Example*

LIGHT → Er. IND.

Er. IND.

DESC. **DOT**

C

Er. IND. — Selection of type of error statement signalization

- selection of type of signalization relates only to error statements on active measuring inputs, which are not currently projected on the display
- error on the displayed active input is always indicated

DEF = DESC.

	Menu	Description
Er. IND.	DESC.	Error statements are displayed as text on the display of measuring units
	DOT	Error statement is signalled only by flashing of the decimal point by the indicated channel number

Selection of type of error statements signalization > DESC.   *Example*

DESC. → PE.CAL.

RE.CAL. ☟ → YES ©☟💾

▲

RE.CAL. Restoration of manufacture calibration

- in the event of error calibration it is feasible to restore manufacture calibration.

Prior to execution of any modifications you will be asked to confirm your selection. (YES)

Restoration of manufacture setting > OB. KAL. *Example*

RE.CAL. ▲ YES ☟ RE.SET.

RE.SET. ☟ → [FIRM. USER] ©☟💾

▲
RE.SET. Restoration of manufacture instrument setting

- in the event of error setting the manufacture setting may be restored
- restoration is performed for the currently selected type of the instrument input (select "TYPE")

- provided you stored your user setting in the "PROFI" menu, it may also be restored (select "USER")
- loading manufacture calibration and primary setting of items on the menu (DEF)

Restoration of manufacture setting > FIRM. *Example*

RE.SET. ▲ FIRM. ☟ LANG. *subsequent item on the menu depends on instrument type, for "DU" > "C. MIN"*

Type "DU"

C. MIN → INP. 1 INP. 2 - - - - - INP. 8 → YES   blink

CK. MIN Calibration of input range -
the potentiometer traveller   *Only for type "DU"*

in initial position

- the inputs for calibration always include
  only active inputs, i.e. those that are ser for
  "MOD > DU".

- prior confirming the flashing "YES" sign the
  potentiometer traveller has to be in given
  idle position

Calibration of the beginning of the range **> C. MIN**   *Example*

YES → C. MAX

C. MAX → INP. 1 INP. 2 - - - - - INP. 8 → YES   blink

C. MAX Calibration of input range -
the potentiometer traveller   *Only for type "DU"*

in end position

- the inputs for calibration always include
  only active inputs, i.e. those that are ser for
  "MOD > DU".

- prior confirming the flashing "YES" sign the
  potentiometer traveller has to be in given
  idle position

Calibration of the end of the range **> C. MAX**   *Example*

YES → LANG.

LANG. Selection of language in instrument menu

- selection of language version of the instrument menu

DEF = ENG

Language selection - ENGLISH > LANG. = ENGL. *Example*

PAS.LI. Setting new access password

- access password for menu LIGHT
- range of the number code 0...9999

Nastavení nového přístupového hesla

- upon setting the password to "000" the access to menu LIGHT is free without prompt to enter it
- in the event of loss universal password "8177" may be used

DEF = 0

New password - 341 > PAS. LI. = 341 *Example*

instrument type | **SW version , µP - 1** | **SW version , µP - 2** | **act. inputs**

`IDENT.` → `YES` `OMU 408UNI` `64-A01` `64-A01` `4 INP.`

`IDENT.` **Instrument SW version**

- the display shows the type of instrument indication, SW number, SW version and current input setting (Mode)
- if SW version contains a letter in first position, then it is a customer SW
- after the identification is completed the menu is automatically exited and the instrument restores the measuring mode

IDENT.	Packet	Description
	1.	type of instrument
	2.	no-of program version - processor 1
	3.	no.of program version - processor 2
	4.	no. of active measuring inputs

`142.8` **Return to measuring mode**

6.0   Setting "PROFI"

PROFI   **Complete programming menu**
- contains complete instrument menu and is protected by optional number code
- designed for expert users
- preset from manufacture is menu **LIGHT**

- **For expert users**
- **Complete instrument menu**
- **Access is password protected**
- **Possibility to arrange items of the „User" menu**
- **Tree menu structure**

Switching over to "PROFI" menu

● + ⬇   • temporary switch-over to **PROFI** menu, which is suitable to edit a few items
- after quitting **PROFI** menu the instrument automatically switches to **LIGHT** menu
- access is password protected (if it was not set under item N. PASS. =0)

● + ☻   • access into **LIGHT** menu and transition to item „MENU" with subsequent selection of „PROFI" and confirmation
- after re-entering the menu the **PROFI** type is active
- access is password protected (if it was not set under item N. PASS. =0)

6.1 Setting "PROFI" - INPUT

INPUTS	CLEAR
CHANNE.	CONFIG.
OUTPUT.	RTC
SERVIC.	Ext. IN.
	KEYS
The primary instrument parameters are set in this menu

CLEAR	Resetting internal values
CONFIG.	Selection of measuring range and parameters
RTC	Setting date and time for option with RTC
Ext. IN.	Setting external inputs functions
KEYS	Assigning further functions to keys on the instrument

6.1.1 Resetting internal values

INPUTS	CLEAR	N TARU	TARE A
CHANNE.	CONFIG.	N.M.M.	TARE B

		INP. 5	3 FAST
		INP. 6	4 FAST
		INP. 7	
		INP. 8	

INPUTS Selection of number of active inputs

- the number of active measuring inputs influences the resulting measuring rate

| 1 INP. | 1 active measuring input |

.....

| 4 INP. | 4 active measuring inputs |
| 5 INP. | 5 active measuring inputs |

.....

| 8 INP. | 8 active measuring inputs |
| 2 FAST | 2 fast measuring inputs |

- inputs 1 and 3 with max. 40 measur./s

| 3 FAST | 3 fast measuring inputs |

- inputs 1, 3 and 5 with max. 40 measur./s

| 4 FAST | 4 fast measuring inputs |

- inputs 1, 3, 5 and 7 with max. 40 meas./s

6.1.2c Selection of measuring mode
IN.MOD.	Selection of measuring mode

CYKL.	Cyclic measurement on all inputs

- number of active measuring inputs is set in the INPUTS/CONFIG/OUTPUTS
- projection of measuring inputs is set in the menu INPUTS/CONFIG/SWITCHIN.
- the cycle option rather significantly affects the measuring rate and depends on the number of active inputs (real measuring rates are listed in chapter Technical data)

SWITCH	Instrument performs measuring only on the

active input

- projection of measuring inputs is set in the menu INPUTS/CONFIG/SWITCH.

6.1.2d Selection of measuring inputs switching
IN.MOD.	Selection of measuring inputs switching

MANUAL	Manual inputs switching

- inputs switching is controlled by selected key on the front panel or selected external input

AUTOM.	Automatic inputs switching

- inputs switching is automatic with time period set in "TIM.SW."

6.1.2e | **Setting period for measuring inputs switching**

- range of the setting is 0...9999
- **DEF** = 0

!

Setting is identical for input B, C, D, E, F, G, H

6.2.1c **Digital filters**

INPUTS   CHAN.A   SET.A   MOD.F.A   NO   DEF
CHANNE.   CHAN B   FILTER   CON.F.A.   AVER.
OUTPUT.   CHAN C   FORM.A   FLOAT.
SERVIC.   CHAN D   DESC.A   EXPON.
    CHAN E   SWIT.A   ROUND
    CHAN F   LOG.A
    CHAN G
    CHAN H
    MAT.FN
    MIN.MAX
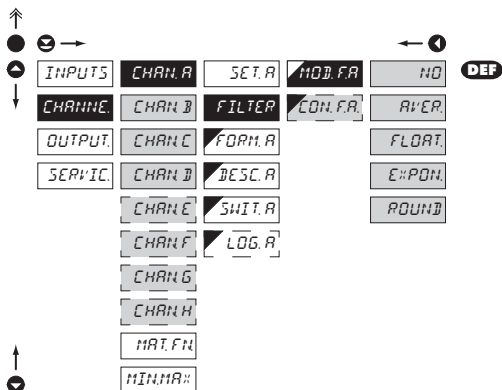

MODE F.A   **Selection of digital filters**

- at times it is useful for better user projection of data on display to modify it mathematically and properly , wherefore the following filters may be used:

NO   Filters are off

AVER.   Measured data average
- arithmetic average from given number („CON.F. A.") of measured values
- range 2...100

FLOAT.   Selection of floating filter
- floating arithmetic average from given number („CON.F. A.") of measured data and updates with each measured value
- range 2...30

EXPON.   Selection of exponential filter
- integration filter of first prvního grade with time constant („CON.F. A.") measurement
- range 2...100

ROUND   Measured value rounding
- is entered by any number, which determines the projection step (e.g: "CON.F. A."=2,5 > display 0, 2.5, 5,...)

CON. F. A.   Setting constants
- this menu item is always displayed after selection of particular type of filter
- **DEF** = 2

!

Setting is identical for input B, C, D, E, F, G, H

6.2.1d | **Projection format - positioning of decimal point**
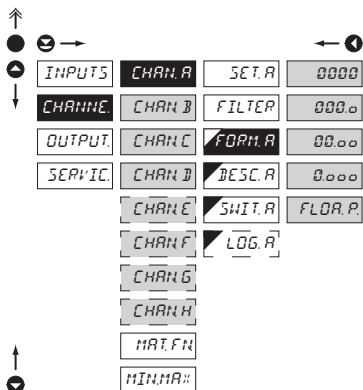

| `FORM.A` | **Selection of decimal point** |

- the instrument allows for classic projection of a number with positioning of the DP as well as projection with floating DP, allowing to display a number in its most exact form „FLOAT.P."

| `0000` | Setting DP - XXXX |

| `000.o` | Setting DP - XXX.x |

- **DEF**

| `00.oo` | Setting DP - XX.xx |

| `0.ooo` | Setting DP - X.xxx |

| `FLOR.P.` | Floating DP |

!

Setting is identical for input B, C, D, E, F, G, H

6.2.1e | **Projection of description - the measuring units**
| `DESC.A` | **Setting projection of descript. for "Channel A"** |

- projection of mesured data may be extended (at the expense of the number of displayed places) by two characters for description
- description is set by shifted ASCII code, when two first places show the set description and two last characters their code in period 0...95
- description is cancelled by code 00
- **RTD** **T/C** **DEF** = °C
- **DC** **PM** **DU** **OHM** **DEF** =none

!

Table of signs on page 95

6.2.1f Selection of channel projection upon switching

INPUTS	CHAN.A	SET.A	NO

		`CON.I`	
		`CON.J`	
		`FORM.M`	
		`DESC.M.`	
		`SWIT.M`	
		`LOG.M`	

`INP.M.` **Selection of input for calculation of mat. function**

- selection of value from which the mathematic function will be calculated

`NO` Mathematic functions are off

`FIL.A` From "input/channel A" after digital filter modification

`FIL.B` From "input/channel B" after digital filter modification

`FIL.C` From "input/channel C" after digital filter modification

`FIL.D` From "input/channel D" after digital filter modification

`FIL.E` From "input/channel E" after digital filter modification

`FIL.F` From "input/channel F" after digital filter modification

`FIL.G` From "input/channel G" after digital filter modification

`FIL.H` From "input/channel H" after digital filter modification

`ALL.F.` From all inputs/channels after digital filter modification

6.2.2b **Mathematic functions**

`MATH. F.` **Selection of mathematic functions**

In selecting „FIL. - " in item „INP. M."

`MULTIN` Polynome

$$Ax^5 + Bx^4 + Cx^3 + Dx^2 + Ex + F$$

`1/MUL` 1/x

$$\frac{A}{x^5} + \frac{B}{x^4} + \frac{C}{x^3} + \frac{D}{x^2} + \frac{E}{x} + F$$

`LOGAR.` Logarithm

$$A \times \ln\left(\frac{Bx + C}{Dx + E}\right) + F$$

`EXPON.` Exponential

$$A \times e^{\left(\frac{Bx+C}{Dx+E}\right)} + F$$

`POWER` Power

$$A \times (Bx + C)^{(Dx+E)} + F$$

`ROOT` Root

$$A \times \sqrt{\frac{Bx + C}{Dx + E}} + F$$

`SIN X` Sin x

$$A \sin^5 x + B \sin^4 x + C \sin^3 x + D \sin^2 x$$
$$+ E \sin x + F$$

In selecting „ALL. F." in item „INP. M."

`SUMA` Total of values from channels (inputs)

(A x KA + B x KB + C x KC + D x KD + G x KE + H x KF + I x KG + J x KH) x E + F

`DIVIDE.` Channels (inputs) values division

(A x KA + C x KC + G x KE + J x KG) /(B x KB + D x KD + H x KF + J x KH) x E + F

`QUADER.` Product of channels (inputs) values

(A x KA² + B x KB² + C x KC² + D x KD² + G x KE² + H x KF² + I x KG² + J x KH²) x E + F

`CON. -` Setting constants for calculation of mat. fce.

- this menu is displayed only after selection of given mathematic function

6.2.2c Mathematic functions - decimal point
FORM. M	Selection of decimal point

- the instrument allows for classic projection of a number with positioning of the DP as well as projection with floating DP, allowing to display a number in its most exact form „FLOA.P."

0000	Setting DP - XXXX
000.o	Setting DP - XXX.x
00.oo	Setting DP - XX.xx
0.ooo	Setting DP - X.xxx
FLOA.P.	Floating DP

- **DEF**

6.2.2d Mathematic functions - measuring units
DESC. M	Setting projection of description for "MAT.FN"

- projection of mesured data may be extended (at the expense of the number of displayed places) by two characters for description
- description is set by shifted ASCII code, when two first places show the set description and two last characters their code in period 0...95
- description is cancelled by code 00
- **DEF** = no description

!

LOG.A Selection of storing data into instrument memory

- by selection in this item you allow to register values into instrument memory
- another setting in item "OUTPUT. > MEMORY" (not in standard equipment)

NO Measured data are not stored

ALL Measured data are stored in memory

IN Only data measured within the set interval are stored in memory

OUT Only data measured outside the set interval are stored in memory

FROM A Setting the initial value of interval
- range f setting: -999...9999

TO A Setting the final value of interval
- range of setting: -999...9999

6.2.3 Selection of evaluation of min/max value

`INPUTS`	`CHAN.A`	`INP.M.M.`	`NO`
`CHANNE.`	`CHAN.B`		`CHAN.A` **DEF**
`OUTPUT.`	`CHAN.C`		`FIL.A`
`SERVIC.`	`CHAN.D`		`CHAN.B`
	`CHAN.E`		`FIL.B`
	`CHAN.F`		`CHAN.C`
	`CHAN.G`		`FIL.C`
	`CHAN.H`		`CHAN.D`
	`MAT.FN`		`FIL.D`
	`MIN.MAX`		`CHAN.E`
			`FIL.E`
			`CHAN.F`
			`FIL.F`
			`CHAN.G`
			`FIL.G`
			`CHAN.H`
			`FIL.H`
			`MAT.FN.`
			`ALL.CH.`
			`ALL.F.`
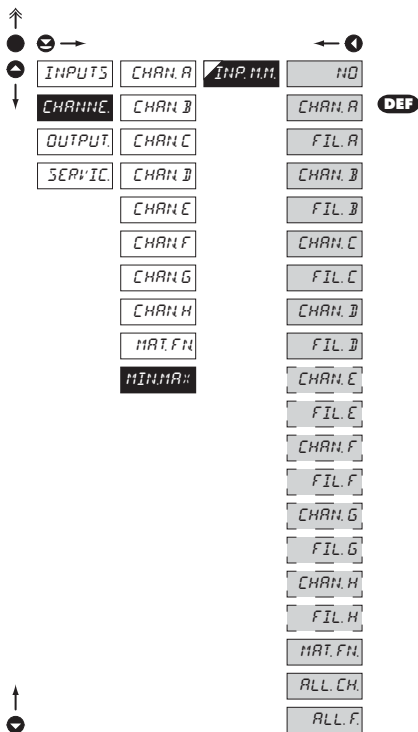

`INP.M.M.` **Selection of evaluation of min/max value**

- selection of value from which the min/max value will be calculated

`NO` Evaluation of min/max value is off

`CHAN. -` From selected input

- selection from inputs 1, 2, 3, 4, 5, 6, 7, 8

`FIL. -` From selected input after digital filter modification

- selection from inputs 1, 2, 3, 4, 5, 6, 7, 8

`MAT.FN.` From "Mathematic functions

`ALL.CH.` From all channels

`ALL.F.` From all inputs after digital filter modification

6.3 Setting „PROFI" - OUTPUTS
In this menu it is possible to set parameters of the instrument output signals

`INPUTS` `MEMORY`
`CHANNE.` `LIMITS`
`OUTPUT.` `DATA`
`SERVIC.` `AN.OUT.`
`DISP.`

`MEMORY` Setting data logging into memory

`LIMITS` Setting type and parameters of limits

`DATA` Setting type and parameters of data output

`AN.OUT.` Setting type and parameters of analog output

`DISP.` Setting display projection and brightness

6.3.1a Selection of mode of data logging into instrument memory

`INPUTS` `MEMORY` `REWRIT.` `YES`
`CHANNE.` `LIMITS` `START` `NO` **DEF**
`OUTPUT.` `DATA` `STOP`
`SERVIC.` `AN.OUT.` `PERIOD.`
`DISP.` `TRIGER`
`REWRIT.` **Selection of the mode of data logging**

- selection of the mode in the event of full instrument memory

`NO` Rewriting values prohibited

`YES` Rewriting values permitted, the oldest get rewritten by the latest

6.3.1b   **Setting data logging into instrument memory - RTC**
START	Start of data logging into instrument memory

- time format HH.MM.SS

STOP	Stop data logging into instrument memory

- time format HH.MM.SS

PERIOD.	Period of data logging into instrument memory

- determines the period in which values will be logged in an interval delimited by the time set under items *START* and *STOP*
- time format HH.MM.SS
- records are made on a daily basis in selected interval and period
- item not displayed if "STORE" is selected in menu *(Input > EXT. IN.)*

6.3.1c   **Setting data logging into instrument memory - FAST**
TRIGER	Setting logging data into inst. memory

- logging data into inst. memory is governed by the following selection, which determines how many percent of the memory is reserved for data logging prior to initiation of trigger imputse
- initialization is on ext. input or button
- setting in range 1...100 %
- when setting 100 %, datalogging works in the mode ROLL > data keep getting rewritten in cycles

1. Memory initialization

- clear memory (ext.input, button)
- LED "M" flashes, after reading TRIGGER (%) memory is permanently lit. In ROLL flashes constantly.

2. Triggering

- external input, button
- after the memory LED is full "M" turns off
- in the ROLL mode the trigger ends datalogging and LED turns off

3 . Termination

- ext.input, button or reading data via RS

6.3.2a Selection of input for limits evaluation

INPUTS	MEMORY	LIM 1	INP.L.1	NO
CHANNE.	LIMITS	LIM 2	CH.L.1	CHAN.A
OUTPUT.	DATA	LIM 3	MOD.L.1	FIL.A
SERVIC.	AN.OUT.	LIM 4	TYP.L.1	CHAN.B
	DISP.	LIM 5	LIM.L.1	FIL.B
		LIM 6	HYS.L.1	CHAN.C
		LIM 7	ON.L.1	FIL.C
		LIM 8	OFF.L.1	CHAN.D
			PER.L.1	FIL.D
			TIM.L.1	CHAN.E
				FIL.E
				CHAN.F
				FIL.F
				CHAN.G
				FIL.G
				CHAN.H
				FIL.H
				MAT.FN.
				MIN
				MAX
				ALL.CH.
				ALL.F.

INP.L.1 Selection evaluation of limits

- selection of value from which the limit will be evaluated

NO Limit evaluation is off
CHAN. – From selected input
- selection from inputs 1, 2, 3, 4, 5, 6, 7, 8
FIL. – From selected input after digital filter modification
- selection from inputs 1, 2, 3, 4, 5, 6, 7, 8
MAT.FN. Limit evaluation from "Mathematic functions"
MIN Limit evaluation from "Min.value"
MAX Limit evaluation from "Max.value"
ALL.CH. From all inputs
ALL.F. From all inputs after digital filter modification

! Setting is identical for LIM 2 ... LIM 8

6.3.2b Selection of channels for limit evaluation

```
INPUTS   MEMORY   LIM 1   INP.L.1   F.A   YES-NO
CHANNE.  LIMITS   LIM 2   CH.L.1    F.B
OUTPUT.   DATA    LIM 3   MOD.L.1   F.C
SERVIC.  AN.OUT.  LIM 4   TYP.L.1   F.D
          DISP.   LIM 5   LIM.L.1   F.E
                  LIM 6   HYS.L.1   F.F
                  LIM 7   ON L.1    F.G
                  LIM 8   OFF.L.1   F.H
                          PER.L.1
                          TIM.L.1
```

CH.L.1   **Selection of channels for limit evaluation**

- function is available only upon setting "ALL.CH." or "ALL.F." in item menu OUTPUT./LIMITS/LIM 1/INP. L1, when selecting "ALL.CH.", then description "CH.A...H"is displayed here, upon selection of "ALL.F." description "F.A...H"

- setting allows assigning an arbitrary number of measuring channels to one limit for their evaluation

- the limit is active if at least one value from arbitrary channel exceeds the set value

- **DEF** = YES

!

Setting is identical for LIM 1, LIM 2, LIM 3 i LIM 4

6.3.2c Selection of type of limit

```
INPUTS   MEMORY   LIM 1   INP.L.1   HYSTER   DEF
CHANNE.  LIMITS   LIM 2   CH.L.1    FROM.
OUTPUT.   DATA    LIM 3   MOD.L.1   DOSING
SERVIC.  AN.OUT.  LIM 4   TYP.L.1
          DISP.   LIM 5   LIM.L.1
                  LIM 6   HYS.L.1
                  LIM 7   ON L.1
                  LIM 8   OFF.L.1
                          PER.L.1
                          TIM.L.1
```

MOD.L.1   **Selection the type of limit**

HYSTER   Limit is in mode "Limit, hysteresis, delay"

- for this mode the parameters of "LIM. L." are set, at which the limit will shall react, "HYS. L." the hysteresis range around the limit (LIM ±1/2 HYS) and time "TIM. L." determining the delay of relay switch-on

FROM.   Frame limit

- for this mode the parameters are set for interval "ON. L." the relay switch-on and "OFF. L." the relay switch-off

DOSING   Dose limit (periodic)

- for this mode the parameters are set for "PER. L." determining the limit value as well as its multiples at which the output is active and "TIM. L." indicating the time during which is the output active

!

Setting is identical for LIM 2 ... LIM 8

profi

6.3.2d Selection of type of output
TYP. L.1	Selection of type of output
CLOSE.	Output switches on when condition is met
OPEN	Output switches off when condition is met

!
Setting is identical for LIM 2 ... LIM 8

6.3.2e Setting values for limits evaluation
LIM. L1	Setting limit for switch-on

- for type "HYSTER"

HYS. L.1	Setting hysteresis

- for type "HYSTER"
- indicates the range around the limit (in both directions, LIM. ±1/2 HYS.)

ON L.1	Setting the outset of the interval of limit switch-on

- for type "FROM"

OFF L.1	Setting the end of the interval of limit switch-on

- for type "FROM"

PER. L.1	Setting the period of limit switch-on

- for type "DOSE"

TIM. L.1	Setting the time switch-on of the limit

- for type "HYSTER" and "DOSE"
- setting in range: ±0...99,9 s
- positive time > relay switches after the limit is exceeded (LIM. L1) and time setting (TIM. L1)
- negative time > relay switches off after the limit is exceeded (LIM. L1) and set negative time (TIM. L1)

!
Setting is identical for LIM 2 ... LIM 8

6.3.3a Selection of data output baud rate

	Selection of data output baud rate
600	Rate - 600 Baud
1200	Rate - 1 200 Baud
2400	Rate - 2 400 Baud
4800	Rate - 4 800 Baud
9600	Rate - 9 600 Baud
19200	Rate - 19 200 Baud
38400	Rate - 38 400 Baud
57600	Rate - 57 600 Baud
115200	Rate - 115 200 Baud
230400	Rate - 230 400 Baud

6.3.3b Setting instrument address

ADDR. Setting instrument address

- setting in range 0...31
- **DEF** = 00

ADR. P. B. Setting instrument address - PROFIBUS

- setting in range 1...247
- **DEF** = 1

6.3.3c   Selection of data output protocol

INPUTS	MEMORY	BAUD	ASCII	**DEF**
CHANNE.	LIMITS	ADDR.	M.BUS

			DISPL.
INP.A.O. Selection evaluation analog output

- selection of value from which the analog output will be evaluated

NO AO evaluation is off

CHAN. - From selected input

- selection from inputs 1, 2, 3, 4, 5, 6, 7, 8

FIL. - From selected input after digital filter modification

- selection from inputs 1, 2, 3, 4, 5, 6, 7, 8

MAT.FN. AO evaluation from "Math.functions"

MIN AO evaluation from "Min.value"

MAX AO evaluation from "Max.value"

DISPL. From currently displayed value

6.3.4b Selection of the type of analog output

`INPUTS`	`MEMORY`	`INP. A.O.`	`0-20mA`
`CHANNE.`	`LIMITS`	`TYP. A.O.`	`E 4-20`
`OUTPUT.`	`DATA`	`MIN A.O.`	`4-20mA`
`SERVIC.`	`AN. OUT.`	`MAX A.O.`	`0-5mA`
	`DISP.`		`0-2V`
			`0-5V`
			`0-10V`
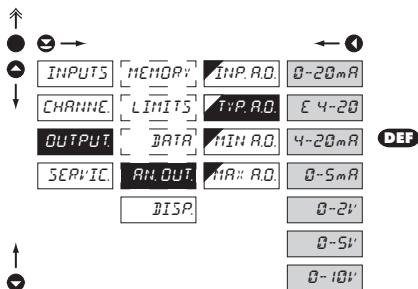

`TYP. A.O.` Selection of the type of analog output

`0-20mA` Type - 0...20 mA

`E 4-20` Type - 4...20 mA

- with indication of error statement (< 3,0 mA)

`4-20mA` Type - 4...20 mA

`0-5mA` Type - 0...5 mA

`0-2V` Type - 0...2 V

`0-5V` Type - 0...5 V

`0-10V` Type - 0...10 V

6.3.4c Setting the analog output range

`INPUTS`	`MEMORY`	`INP. A.O.`	`0.0`
`CHANNE.`	`LIMITS`	`TYP. A.O.`	
`OUTPUT.`	`DATA`	`MIN A.O.`	
`SERVIC.`	`AN. OUT.`	`MAX A.O.`	
	`DISP.`		
`AN. OUT.` Setting the analog output range

- analog output is isolated and its value corresponds with displayed data. It is fully programmable, i.e. it allows to assign the AO limit points to two arbitrary points of the entire measuring range

`MIN A.O.` Assigning the display value to the beginning of the AO range
- range of the setting is -999...9999
- **DEF** = 0

`MAX A.O.` Assigning the display value to the end of the AO range
- range of the setting is -999...9999
- **DEF** = 100

6.3.5a Selection of input for display projection

INPUTS	MEMORY	PERM.	CHAN. A	DEF
CHANNE.	LIMITS	CHAN.	FIL. A

			FIL. G	
			CHAN. H	
			FIL. H	
			MAT. FN.	
			MIN	
			MAX	
PERM. — Selection display projection

- selection of value which will be shown on the instrument display

CHAN. A	Projection of values from "Channel A"
FIL. A	From "Channel A" after digital filters processing
CHAN. B	Projection of values from "Channel B"
FIL. B	From "Channel B" after digital filters processing
CHAN. C	Projection of values from "Channel C"
FIL. C	From "Channel C" after digital filters processing
CHAN. D	Projection of values from "Channel D"
FIL. D	From "Channel D" after digital filters processing
CHAN. E	Projection of values from "Channel E"
FIL. E	From "Channel E" after digital filters processing
CHAN. F	Projection of values from "Channel F"
FIL. F	From "Channel F" after digital filters processing
CHAN. G	Projection of values from "Channel G"
FIL. G	From "Channel G" after digital filters processing
CHAN. H	Projection of values from "Channel H"
FIL. H	From "Channel H" after digital filters processing
MAT. FN.	Projection of values from "Math.functions"
MIN.	Projection of values from "Min.value"
MAX	Projection of values from "Max.value"

6.3.5b   Selection of signalization of measuring inputs on display
`CHAN.`	**Selection of inputs signalization**

`NO`	Display is off
`NUMBER.`	Numeric description of inputs

- inputs are marked 1, 2, 3, 4, 5, 6, 7, 8

`CHARS.`	Alphabetical description of inputs

- inputs are marked A, B, C, D, E, F, G, H

Diagram menu items:
INPUTS, MEMORY, PERM., NO
CHANNE., LIMITS, CHAN., NUMBER. DEF
OUTPUT., DATA, BRIGHT., CHARS.
SERVIC., AN.OUT.
DISP.

6.3.5c   Selection of display brightness
`BRIGHT`	**Selection of display brightness**

- by selecting display brightness we may appropriately react to light conditions in place of instrument location

`0%`	Display is off

- after keystroke display turns on for 10 s

`25%`	Display brightness - 25 %
`50%`	Display brightness - 50 %
`75%`	Display brightness - 75 %
`100%`	Display brightness - 100 %

Diagram menu items:
INPUTS, MEMORY, PERM., 100% DEF
CHANNE., LIMITS, CHAN., 75%
OUTPUT., DATA, BRIGHT., 50%
SERVIC., AN.OUT., 25%
DISP., 0%

> **!**
>

6.4 Setting "PROFI" - SERVICE
The instrument service functions are set in this menu

MENU	Selection of menu type LIGHT/PROFI
Er. IND.	Selection of type of error statement signalization
RESTOR.	Restore instrument manufacture setting and calibration
CALIB	Input range calibration for „DU" version
LANG.	Language version of instrument menu
N. PASS.	Setting new access password
IDENT.	Instrument identification

6.4.1 Selection of type of programming menu
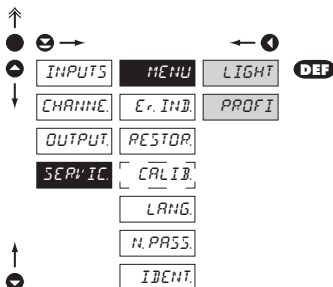

MENU	**Selection of menu type - LIGHT/PROFI**

- enables setting the menu complexity according to user needs and skills

LIGHT	Active LIGHT menu

- simple programming menu, contains only items necessary for configuration and instrument setting
- linear menu > items one after another

PROFI	Active PROFI menu

- complete programming menu for expert users
- tree menu

!

Change of setting is valid upon next access into menu

6.4.2 **Selection of type of error statement signalization**
INPUTS	MENU	DESC.	DEF
CHANNE.	Er.IND.	DOT	
OUTPUT.	RESTOR.		
SERVIC.	CALIB.		
	LANG.		
	N.PASS.		
	IDENT.		

Er.IND. Selection of type of error statement signalization

- selection of type of signalization relates only to error statements on active measuring inputs, which are not currently projected on the display
- error on the displayed active input is always indicated

DESC. Error statements are displayedas text on the display of measuring units
- signalization "E" + no. of input/channel indicating where a measuring error occurred

DOT Error statement is signalled only by flashing of the decimal point by the indicated channel number

---

6.4.3 **Restoration of manufacture setting**

INPUTS	MENU	RE.CAL.	YES
CHANNE.	Er.IND.	RE.SET.	
OUTPUT.	RESTOR.	SAVE	
SERVIC.	CALIB.		
	LANG.		
	N.PASS.		
	IDENT.		
RESTOR. Restoration of manufacture setting

- in the event of error setting or calibration, manufacture setting may be restored.

RE.CAL. Restoration of manufacture calibration of the instrument

- prior executing the changes you will be asked to confirm you selection „YES"

INPUTS   MENU   RE.CAL.   FIRM.
CHANNE.   Er.IND.   RE.SET.   USER
OUTPUT.   RESTOR.   SAVE
SERVIC.   CALIB.
          LANG.
          N.PASS.
          IDENT.
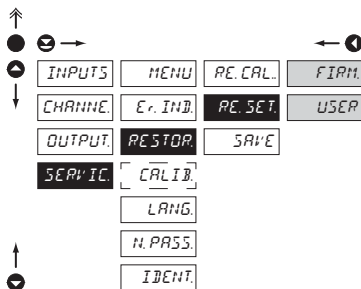

RE.SET. **Restoration of instrument manufacture setting**

FIRM. Restoration of instrument manufacture setting

- generating the manufacture setting for currently selected type of instrument (items marked DEF)
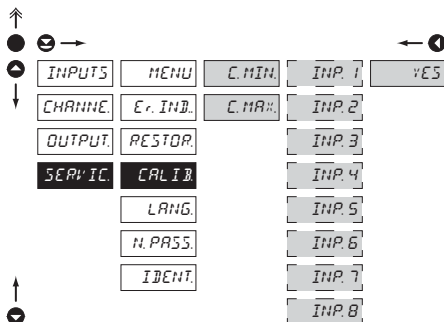

USER Restoration of instrument user setting

- generating the instrument user setting, i.e. setting stored under SERVIC./RESTOR./SAVE

SAVE Save instrument user setting

- storing the user setting allows the operator to restore it in future if needed

---

6.4.4   Calibration - Input range   **DU**

INPUTS   MENU   C.MIN.   INP.1   YES
CHANNE.   Er.IND.   C.MAX.   INP.2
OUTPUT.   RESTOR.   INP.3
SERVIC.   CALIB.   INP.4
          LANG.   INP.5
          N.PASS.   INP.6
          IDENT.   INP.7
                              INP.8

CALIB. **Input range calibration**

- the inputs for calibration always include only active inputs, i.e. those that are ser for "MOD > DU".

- after projection of "C. MIN" and selection of relevant input move the potentiometer runner into required minimum position and confirm by „Enter", calibration is confirmed by „YES" notice

- after projection of "C. MAX." and selection of given input move the potentiometer into required maximum position and confirm by „Enter", calibration is confirmed by „YES"

**6.4.5**   **Selection of instrument menu language version**

INPUTS	MENU	CZECH
CHANNE.	Er.IND.	ENGL. **DEF**
OUTPUT.	RESTOR.	
SERVIC.	CALIB.	
	LANG.	
	N.PASS.	
	IDENT.	
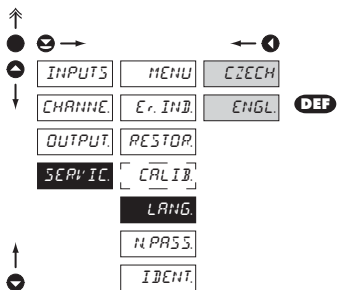

LANG.	**Selection of instrument menu language version**
CZECH	Instrument menu is in Czech
ENGL.	Instrument menu is in English

6.4.6   **Setting new access password**

INPUTS	MENU	PAS.LI.	0
CHANNE.	Er.IND.	PAS.PR.	
OUTPUT.	RESTOR.		
SERVIC.	CALIB.		
	LANG.		
	N.PASS.		
	IDENT.		
N.PASS.	**Setting new password for access to LIGHT and PROFI menu**

- this selection enables changing number code that blocks the access into LIGHT and PROFI Menu.
- range of the number code is 0...9999
- universal password in the event of loss:
  LIGHT Menu > „8177"
  PROFI Menu > „7915"

6.4.7	**Instrument identification**

INPUTS	MENU	OMU 408UNI	64-A01	64-A01	4 INP.
CHANNE.	Er.IND.				
OUTPUT.	RESTOR.				
SERVIC.	CALIB.				
	LANG.				
	N.PASS.				
	IDENT.				

IDENT. | **Projection of instrument SW version**

- display shows type identification of the instrument, SW number, SW version and current input setting (Mode)
- if the SW version reads a letter on first position, it is a customer SW
- after the identification is completed the menu is automatically exited and the instrument restores the measuring mode

	Packet	Description
IDENT.	1.	type of instrument
	2.	no-of program version - processor 1
	3.	no.of program version - processor 2
	4.	no. of active measuring inputs

7.0 Setting items into "USER" menu

- **USER** menu is designed for users who need to change only several items of the setting without the option to change the primary instrument setting (e.g. repeated change of limit setting)
- there are no items from manufacture permitted in **USER** menu
- on items indicated by inverse triangle ` L 1 `
- setting may be performed in **LIGHT** or **PROFI** menu, with the **USER** menu then overtaking the given menu structure

- **For user operation**
- **Menu items are set by the user (Profi/Light) as per request**
- **Access is not password protected**

Setting

flashing legend - current setting is displayed

return to item

`NO`	item will not be displayed in USER menu
`YES`	item will be displayed in USER menu with editing option
`SHOW`	item will be solely displayed in USER menu

Setting sequence of items in "USER" menu

In compiling USER menu from active LIGHT menu the items (max. 10) may be assigned a sequence, in which they will be projected in the menu

setting projection sequence

`-- -- --` ⊙ + ⊙ `0`

Example:

Into USER menu were selected these items

(keys ⊙ + ⊙) > *TARE A, LIM 1, LIM 2, LIM 3,* for which we have preset this sequence (keys ⊙ + ⊙):

TARE A	5
LIM 1	0 (sequence not determined)
LIM 2	2
LIM 3	1

Upon entering USER menu

(key ●) items will be projected in the following sequence: LIM 3 > LIM 2 > TARE A > LIM 1

Instrument with input for temperature measurement with thermocouple allows to set two types of measurement of cold junction.

Measuring thermocouple

OM xxx T/C

Reference thermocouple
WITH REFERENCE THERMOCOUPLE

– a reference thermocouple may be located in the same place as the measuring instrument or in place with stable tempera-ture/compensation box

– when measuring with reference thermocouple set $CONECT.$ in the instrument menu to $INT2TC$ or $EXT2TC$

– when using a thermostat (a compensation box or environment with constant temperature) set in the instrument menu $CJC.TEM.$ its temperature (applies for setting $CONECT.$ to $EXT2TC$)

– if the reference thermocouple is located in the same environment as the measuring instrument then set in the instrument menu $CONECT.$ to $INT2TC.$ Based on this selection the measurement of the ambient temperatureis performed by a sensor located in the instrument terminal board.

WITHOUT REFERENCE THERMOCOUPLE

– inaccuracy originating from the creation of dissimilar thermocouples on the transition point terminal/conductor of the thermocouple is not compensated for in the instrument

– when measuring without reference thermocouple set $CONECT.$ in the instrument menu to $INT.ITC$ or $EXT.ITC$

– when measuring temperature without reference thermocouple the error in measured data may be as much as 10°C (applies for setting $CONECT.$ to $EXT.ITC$)

> **!**
>
> *If at least 1 thermocouple uses internal compensation of cold junction, it has to be measured on 1st channel. Only on this channel it is possible to measure the temperature of cold junction, which is used for all channels with thermocouples.*

The instruments communicate via serial line RS232 or RS485. For communication they use the ASCII protocol. Communication runs in the following format:

ASCII: 8 bit, no parity, one stop bit
DIN MessBus: 7 bit, even parity, one stop bit

The transfer rate is adjustable in the instrument menu. The instrument address is set in the instrument menu in the range of 0 ÷ 31. The manufacture setting always presets the ASCII protocol, rate of 9600 Baud, address 00. The type of line used - RS232 / RS485 - is determined by an output board automatically identified by the instrument.

The commands are described in specifications you can find at na www.orbit.merret.cz/rs or in the OM Link program.

DETAILED DESCRIPTION OF COMMUNICATION VIA SERIAL LINE

Event	Type	Protocol	Transmitted data												
Data solicitation (PC)	232	ASCII	#	A	<CR>										
	232	MessBus	No - data is transmitted permanently												
	485	ASCII	#	A	<CR>										
	485	MessBus	<SADR>	<ENQ>											
Data transmission (instrument)	232	ASCII	>	D	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	<CR>	
	232	MessBus	<SADR>	D	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	<ETX>	<BCC>
	485	ASCII	>	D	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	<CR>	
	485	MessBus	<SADR>	D	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	<ETX>	<BCC>
Confirmation of data acceptance (PC) - OK	485	MessBus	<DLE>	1											
Confirmation of data acceptance (PC) - Bad	485	MessBus	<NAK>												
Sending address (PC) prior command	485	MessBus	<EADR>	<ENQ>											
Confirmation of address (instrument)	485	MessBus	<SADR>	<ENQ>											
Command transmission (PC)	232	ASCII	#	A	A	N	P	(D)	(D)	(D)	(D)	(D)	(D)	(D)	<CR>
	232	MessBus	<STX>	$	N	P	(D)	(D)	(D)	(D)	(D)	<ETX>	<BCC>		
	485	ASCII	#	A	A	N	P	(D)	(D)	(D)	(D)	(D)	(D)	(D)	<CR>
	485	MessBus	<SADR>	$	N	P	(D)	(D)	(D)	(D)	(D)	<ETX>	<BCC>		
Command confirmation (instrument)	232	ASCII OK	!	A	A	<CR>									
	232	ASCII Bad	?	A	A	<CR>									
	232	Messbus	No - data is transmitted permanently												
	485	ASCII OK	!	A	A	<CR>									
	485	ASCII Bad	?	A	A	<CR>									
	485	MessBus OK	<DLE>	1											
	485	MessBus Bad	<NAK>												
Command confirmation (inst.) - OK	485	MessBus	!	A	A	<CR>									
Command confirmati (instrument) - Bad	485	MessBus	?	A	A	<CR>									
Instrument identification			#	A	A	1Y	<CR>								
HW identification			#	A	A	1Z	<CR>								
One-time transmission			#	A	A	7X	<CR>								
Repeated transmission			#	A	A	8X	<CR>								

LEGEND

#	35	23_H	Command beginning
A A		0...31	Two characters of instrument address (sent in ASCII - tens and units, e.g. "01", "99" universal
<CR>	13	$0D_H$	Carriage return
<SP>	32	20_H	Space
N, P			Number and command - command code
D			Data - usually characters "0"..."9", "-", "."; (D) - dp. and (-) may prolong data
R	30_H...$3F_H$		Relay and tare status
!	33	21_H	Positive confirmation of command (ok)
?	63	$3F_H$	Negative confirmation of command (point)
>	62	$3E_H$	Beginning of transmitted data
<STX>	2	02_H	Beginning of text
<ETX>	3	03_H	End of text
<SADR>	addresa +60_H		Prompt to send from address
<EADR>	addresa +40_H		Prompt to accept command at address
<ENQ>	5	05_H	Terminate address
<DLE>1	16 49	10_H 31_H	Confirm correct statement
<NAK>	21	15_H	Confirm error statement
<BCC>			Check sum -XOR

RELAY, TARE

Sign	Relay 1	Relay 2	Tare	Change relay 3/4
P	0	0	0	0
Q	1	0	0	0
R	0	1	0	0
S	1	1	0	0
T	0	0	1	0
U	1	0	1	0
V	0	1	1	0
W	1	1	1	0
p	0	0	0	1
q	1	0	0	1
r	0	1	0	1
s	1	1	0	1
t	0	0	1	1
u	1	0	1	1
v	0	1	1	1
w	1	1	1	1

Relay status is generated by command #AA6X <CR>.
The instrument immediately returns the value in the format >HH <CR>, where HH is value in HEX format and range 00_H...FF_H. The lowest bit stands for „Relay 1", the highest for „Relay 8"

ERROR	CAUSE	ELIMINATION
E. D. U n	Number is too small (large negative) to be displayed	change DP setting, channel constant setting
E. D. Ov.	Number is too large to be displayed	change DP setting, channel constant setting
E. T. U n	Number is outside the table range	increase table values, change input setting (channel constant setting)
E. T. Ov.	Number is outside the table range	increase table values, change input setting (channel constant setting)
E. I. U n	Input quantity is smaller than permitted input quantity range	change input signal value or input (range) setting
E. I. Ov.	Input quantity is larger than permitted input quantity range	change input signal value or input (range) setting
E. HW	A part of the instrument does not work properly	send the instrument for repair
E. EE	Data in EEPROM corrupted	perform restoration of manufacture setting, upon repeated error statement send instrument for repair
E. SET.	Data in EEPROM outside the range	change setting if dependent items, perform restoration of manufacture setting, upon repeated error statement send instrument for repair
E. CLR.	Memory was empty (presetting carried out)	upon repeated error statement send instrument for repair, possible failure in calibration

Type of error signalization on channels, which are not currently displayed is selectable in menu SERVIC./Er. IND.

The instrument allows to add two descriptive characters to the classic numeric formats (at the expense of the number of displayed places). The setting is performed by means of a shifted ASCII code. Upon modification the first two places display the entered characters and the last two places the code of the relevant symbol from 0 to 95. Numeric value of given character equals the sum of the numbers on both axes of the table.

Description is cancelled by entering characters with code 00

INPUT

Number:	4/8 inputs	
	- automatic or manual switching	

range is adjustbale			**DC**
	±60 mV	>100 MOhm	Input U
	±150 mV	>100 MOhm	Input U
	±300 mV	>100 MOhm	Input U
	±1200 mV	>100 MOhm	Input U

range is adjustbale			**PM**
	0/4...20 mA	< 400 mV	Input I
	±2 V	1 MOhm	Input U
	±5 V	1 MOhm	Input U
	±10 V	1 MOhm	Input U
	±40 V	1 MOhm	Input U

range is adjustbale		**OHM**
	0...100 Ohm	
	0...1 kOhm	
	0...10 kOhm	
	0...100 kOhm	
Connection:	2, 3 or 4 wire	

		RTD
Pt xxxx	-200°...850°C	
Pt xxxx/3910 ppm	-200°...1 100°C	
Ni xxxx	-50°...250°C	
Cu/4260 ppm	-50°...200°C	
Cu/4280 ppm	-200°...200°C	
Type Pt:	EU > 100/500/1 000 Ohm, with 3 850 ppm/°C	
	US > 100 Ohm, with 3 920 ppm/°C	
	RU > 50/100 Ohm, with 3 910 ppm/°C	
Type Ni:	Ni 1 000/ Ni 10 000 with 5 000/6 180 ppm/°C	
Type Cu:	Cu 50/Cu 100 with 4 260/4 280 ppm/°C	
Connection:	2, 3 or 4 wire	

range is adjustbale in configuration menu			**T/C**
Type:	J (Fe-CuNi)	-200°...900°C	
	K (NiCr-Ni)	-200°...1 300°C	
	T (Cu-CuNi)	-200°...400°C	
	E (NiCr-CuNi)	-200°...690°C	
	B (PtRh30-PtRh6)	300°...1 820°C	
	S (PtRh10-Pt)	-50°...1 760°C	
	R (Pt13Rh-Pt)	-50°...1 740°C	
	N (Omegalloy)	-200°...1 300°C	
	L (Fe-CuNi)	-200°...900°C	

		DU
Voltage of lin. pot.	2,5 VDC/6 mA	
	min. potentiometer resistance is 500 Ohm	

PROJECTION

Measured value	9999, intensive red or green
	14-segment LED, digit height 14 mm

Description	99, intenzive red or green	
	14-segment LED, digit height 10 mm	
Input number	9, intensive red or green	
	7-segment LED, digit height 9 mm	
Projection:	-999...9999	
Decimal point:	adjustable - in menu	
Brightness:	adjustbale - in menu	

INSTRUMENT ACCURACY

TC:	100 ppm/°C	
Accuracy:	±0,1 % of range + 1 digit	
	±0,15 % of range + 1 digit	**RTD, T/C**
Resolution:	0,01°/0,1°/1°	**RTD**
Rate:	0,1...40 measurements/s**	
Overload capacity:	10x (t < 100 ms), 2x (long-term)	
Linearisation:	by linear interpolation in 254 points (solely via OM Link)	
Digital filters:	Averaging, Floating average, Exponential filter, Rounding	
Inputs switching:	0,5 ... 99,9 s	
Comp. of conduct.:	max. 40 Ohm/100 Ohm	**RTD**
Comp. of cold junct.:	adjustable	**T/C**
	0°...99°C or automatic	
Functions:	Tare - display resetting	
	Hold - stop measuring (at contact)	
	Lock - control key locking	
	MM - min/max value	
	Mathematic functions	
OM Link:	company communication interface for setting, operation and update of instrument SW	
Watch-dog:	reset after 400 ms	
Calibration:	at 25°C and 40 % of r.h.	

COMPARATOR

Type:	digital, adjustable in menu
Mode:	Hysteresis, From, Dosing
Limita:	-999...9999
Hysteresis:	0...9999
Delay:	0...99,9 s
Outputs:	4x/8x relays with switch-on contact (Form A)
	(230 VAC/30 VDC, 3 A)*
Relay:	1/8 HP 277 VAC, 1/10 HP 125 V, Pilot Duty D300

DATA OUTPUTS

Protocols:	ASCII, DIN MessBus, MODBUS, PROBUS
Data format:	8 bit + no parity + 1 stop bit (ASCII)
	7 bit + even parity + 1 stop bit (MessBus)
Rate:	600...230 400 Baud
	9 600 Baud...12 Mbaud (PROFIBUS)
RS 232:	isolated, two-way communication
RS 485:	isolated, two-way communication,
	addressing (max. 31 instruments)
PROFIBUS	Data protocol SIEMENS

* values apply for resistance load

ANALOG OUTPUTS

Type:	isolated, programmable with resolution of max.10 000 points, analog output corresponds with displayed data, type and range are adjustable
Non-linearity:	0,2 % of range
TC:	100 ppm/°C
Rate:	response to change of value < 150 ms
Voltage:	0...2 V/5 V/10 V
Curernt:	0...5/20 mA/4...20 mA
	- compensation of conduct to 500 Ohm/12 V or 1 000 Ohm/24 V

MEASURED DATA RECORD

Type RTC:	time-controlled logging of measured data into instrument memory, allows to log up to 250 000 values
Type FAST:	fast data logging into instrument memory, allows to log up to 8 000 values at a rate of 40 records/s

No. of channels	Number of recorded data	Length of the records at 40 m/s [s]
1	16384	409,6
2	8192	204,8
3	5461	136,5
4	4096	102,4
5	3276	81,9
6	2730	68,25
7	2340	58,5
8	2048	50,1
9	1820	45,5

Transmission: via data output RS 232/485 or via OM Link

POWER SUPPLY

Options:	10...30 V AC/DC, max 13,5 VA, isolated, - fuse inside (T 4000 mA) 80...250 V AC/DC, max. 13,5 VA, isolated - fuse inside (T 630 mA)

MECHANIC PROPERTIES

Material:	Noryl GFN2 SE1, incombustible UL 94 V-I
Dimensions:	96 x 48 x 120 mm
Panel cut-out:	90,5 x 45 mm

OPERATING CONDITIONS

|	
Connection:	connector terminal board, conductor cross-section <1,5 mm² /<2,5 mm²
Stabilisation period:	within 15 minutes after switch-on
Working temp.:	0°...60°C
Storage temp.:	-10°...85°C
Cover:	IP65 (front panel only)
Construction:	safety class I
Dielectric strength:	4 kVAC after 1 min between supply and input 4 kVAC after 1 min between supply and data/analog output 4 kVAC after 1 min between supply and relay output 2,5 kVAC after 1 min between supply and data/analog output
Overvoltage cat.:	EN 61010-1, A2
Insulation resistance:	for pollution degree II, measurement category III instrum.power supply > 670 V (PI), 300 V (DI) Input/output > 300 V (PI), 150 (DI)
EMC:	EN 61000-3-2+A12; EN 61000-4-2, 3, 4, 5, 8, 11; EN 550222, A1, A2
Seismic resistance:	IEC 980: 1993, čl. 6

**Table of measuring rate on one channel, according to setting of input mode and type of measurement

Channels/Rate	40	20	10	5	2	1	0,5	0,2	0,1
Input mode > SWITCH - single channel measurement	40,00	20,00	10,00	5,00	2,00	1,00	0,50	0,20	0,10
Input mode > SWITCH - dual channel measurement	6,667	3,333	1,667	1,25	0,714	0,417	0,227	0,096	0,049
Input mode > CYCLE - 2x single channel meas.	6,667	3,333	1,667	1,25	0,714	0,417	0,227	0,096	0,049
Input mode > CYCLE - 1x single + 1x dual channel measurement	4,444	2,222	1,111	0,833	0,476	0,278	0,152	0,064	0,033
Input mode > CYCLE - 2x dual channel measurement	3,333	1,667	0,833	0,625	0,357	0,208	0,114	0,048	0,025

Measuring rate in the menu is indicated for mode SWITCH and single channel measurement.
Single channel measurement > DC, PM, DU, OHM - 2/4 wire, Pt - 2/4 wire, Ni - 2/4 wire, Cu - 2/4 wire, TC on 1st input with external compensation, TC on other inputs
Dual channel measurement > OHM - 3 wire, Pt - 3 wire, Ni - 3 wire, Cu - 3 wire, TC on 1st input with internal compensation
If at least one TC measurement with internal compensation is to be used, IT HAS TO BE connected on 1st input. Cold junction value is measured here!
The instrument contains up to 4 A/D converters that always control one pair of inputs 1. + 2., 3. + 4., 5 + 6., 7. + 8. Converters measure almost simultaneously.
Front view

96 mm

48 mm

Panel cut

90,5 mm

45 mm

Side view

119 mm

13,5 mm
Panel thickness: 0,5...20 mm

Instrument installation

1. insert the instrument into the panel cut-out
2. fit both travellers on the box
3. press the travellers close to the panel

Instrument disassembly

1. slide a screw driver under the traveller wing
2. turn the screw driver and remove the traveller
3. take the instrument out of the panel

Product   **OMU 408UNI**

Type   . . . .

Manufacturing No.   . . . .

Date of sale   . . . .

A guarantee period of 60 months from the date of sale to the user applies to this instrument.
Defects occuring during this period due to manufacture error or due to material faults shall be eliminated free of charge.

For quality, function and construction of the instrument the guarantee shall apply provided that the instrument was connected and used in compliance with the instructions for use.

The guarantee shall not apply to defects caused by:

- mechanic damage
- transportation
- intervention of unqualified person incl. the user
- unavoidable event
- other unprofessional interventions

The manufacturer performs guarantee and post.guarantee repairs unless provided for otherwise.

DECLARATION OF CONFORMITY

Company:	**ORBIT MERRET, spol. s r.o.**
	Klánova 81/141, 142 00 Prague 4, Czech Republic, IDNo: 00551309
Manufactured:	**ORBIT MERRET, spol. s r.o.**
	Vodňanská 675/30, 198 00 Prague 9, Czech Republic

declares at its explicit responsibility that the product presented hereunder meets all technical requirements, is safe for use when utilised under the terms and conditions determined by ORBIT MERRET, spol.s r.o. and that our company has taken all measures to ensure conformity of all products of the types referred to hereunder, which are being brought out to the market, with technical documentation and requirements of the appurtenant Czech statutory orders.

Product:	4-digit programmable panel instrument
Type:	**OMU 408UNI**

It has been designed and manufactured in line with requirements of:
Statutory order no. 17/2003 Coll., on low-voltage electrical equipment (directive no. 73/23/EHS)
Statutory order no. 18/2003 Coll., on electromagnetic compatibility (directive no. 89/336/EHS)

The product qualities are in conformity with harmonized standard:

Electrical safety:	EN 61010-1	
EMC:	EN 50131-1, chapter 14 and chapter 15	
	EN 50130-4, chapter 7	
	EN 50130-4, chapter 8	EN 61000-4-11, ed. 12
	EN 50130-4, chapter 9	EN 61000-4-2
	EN 50130-4, chapter 10	EN 61000-4-3, ed. 12
	EN 50130-4, chapter 11	EN 61000-4-6
	EN 50130-4, chapter 12	EN 61000-4-4, ed. 12
	EN 50130-4, chapter 13	EN 61000-4-5
	EN 61000-4-8	
	EN 61000-4-9	
	EN 61000-6-1	
	EN 61000-6-2	
	EN 55022, chapter 5 and chapter 6	

The product is furnished with CE label issued in 2007.

As documentation serve the protocoles of authorized and accredited organizations:
MO ČR, Agency for development of informatics, testing lab no.1558, accredited ČIA, in compliance with EN ISO/EIC 17025

Place and date of issue:	Prague, 13. November 2007	Miroslav Hackl v.r.
		Company representative

Assessment of conformity pursuant to §22 of Act no. 22/1997 Coll. and changes as amended by Act no.71/2000 Coll. and 205/2002 Coll.
